

What do I want to learn or understand better?

I really want to learn react component life cycle as well as getting more confident in async functions. we need local database for this project, so I need to learn that to reach our goal.

How can I help someone else or the entire team to learn something new?

*Same as the last week

What is my contribution towards the team's use of scrum?

Using Trello board and good communication on discord when it needed.

What is my contribution towards the team's deliveries?

I did my user story and I tried to explain some topics to some members.
