What do I want to learn or understand better?

I'm familiar with web development but I want to improve my design abilities, so I tried to focus on the mockup and did my version on paper as well as improved the Figma version. I want to learn how the API we chose works and how to make the most of it. I have learnt the basics of Agile and SCRUM and my goal is to improve these abilities the best I can

How can I help someone else, or the entire team, to learn something?

This week I gave some feedback on the Figma version of the mockup which had some shortcomings. I tried to express my opinions without imposing them. I sent some websites to get some inspiration to help us design the mockup.

What is my contribution towards the team's use of SCRUM?

Uncertain since we have not started with Scrum related activities yet.

What is my contribution towards the team's deliveries?

I was part of the meetings this week where we searched for APIs that we need for the project. I contributed the business model canvas and the project description. I Did the paper mockup and improved the digital version.
